*a peer-reviewed journal devoted to bridging the gap between academic
research and policymaking on issues related to the Asia-Pacific*

PUBLICATION ETHICS STATEMENT

Asia Policy, a quarterly journal of the National Bureau of Asian Research (NBR), accepts as submissions original articles and essays containing policy-relevant academic research on political, economic, security, and energy and environmental issues related to the Asia-Pacific. NBR is committed to upholding best practices in all stages of the publication process. Expectations for and responsibilities of *Asia Policy* authors, editors, and reviewers are based on the standards established as core practices by the [Committee on Publications Ethics \(COPE\)](#).¹

Responsibilities of Authors

- **Reporting Standards:** Authors should accurately present their work and the underlying data and offer an objective discussion of its significance. Fraudulent or knowingly inaccurate statements constitute unethical behavior and are not accepted. Authors should promptly notify the editors or publisher if a significant error in their work is identified and cooperate with the editor and publisher to rectify the error, publish an online erratum or addendum, or to retract the paper where deemed necessary. Submissions should follow the requirements of the journal as outlined in the *Asia Policy* Guidelines for Submission.
- **Authorship of the Paper:** All authors named on the submitted manuscript are responsible for the content of a submitted manuscript. The corresponding author must ensure all named co-authors consent to publication and to be credited as co-authors. All persons who have made significant authorship contributions to the work should be named as co-authors.
- **Data Access and Retention:** Authors may be asked to provide copies of the data associated with the manuscript for editorial review and should be prepared to retain such data for a reasonable time after publication.
- **Multiple, Redundant, or Concurrent Publications:** Authors must disclose the background of the manuscript upon submission of the first draft, including if the paper or any component parts have been presented at any conferences or have appeared online in any form. Authors must warrant that the manuscript has not been published elsewhere in full or in part and is not under consideration by any other organization while it is being considered by *Asia Policy*.
- **Originality and Plagiarism:** Authors must ensure that they have written and submitted original manuscripts, and that they have correctly cited or quoted their own works and the works of other authors. Authors must be able to guarantee their work cannot be construed as libelous or as infringing on a preexisting copyright.
- **Acknowledgement of Sources:** All prior use of arguments in the manuscript—whether in English or any other language—must be properly cited at the time of submission.

¹ The organization of these guidelines draws on the Policies and Guidelines published by [Elsevier](#), and they are informed by the core practices of [COPE](#). *Asia Policy* is not directly affiliated with Elsevier or COPE.

Responsibilities of Editors

- **Publication Process and Decisions:** The managing editor, in consultation as needed with the editors and editorial advisory committee, shall prescreen all submissions to establish that they meet the submission guidelines and represent original work. Submitted research article and essay manuscripts that pass the prescreen stage will undergo peer review by subject matter experts. Roundtable essays, special essays, series essays, and book reviews are by the invitation of the journal and not subject to the peer-review process. The managing editor shall request or accept changes to the manuscript based on the peer-review process as well as on advice from the editors, editorial advisory committee, and editorial board. Guided by the editors and the review process, the managing editor and publisher shall be responsible for deciding which manuscripts should be published and for conveying publication decisions to authors. For accepted submissions, the managing editor will continue to work with the author through the editing, editing review, and publication process.
- **Review of Articles:** Manuscripts that pass the prescreen stage shall be submitted to a double-blind peer-review process. Reviewers shall provide substantive comments on the manuscript and make one of the following decisions: publish, publish with revision, revise and resubmit, or reject. Reviewer identities shall be kept confidential. The journal shall endeavor to conduct the prescreen and review processes in a timely way.
- **Fair Play:** The editorial team and the publisher shall ensure that all manuscripts received are reviewed on their intellectual merit and without regard to the race, gender, sexual orientation, religious belief, ethnic origin, citizenship, or political philosophy.
- **Confidentiality:** The editorial team must ensure that information in submissions is kept confidential, and shared only with the corresponding author, reviewers, potential reviewers, editorial advisers, and the publisher, as appropriate.
- **Disclosure and Conflicts of Interest:** Editor team members must not use unpublished materials under consideration in their own research or in a submitted article without author consent. Editors must also disclose any potential conflicts of interest before beginning the review process and should not agree to review manuscripts in which they have conflicts of interest resulting from competitive, collaborative, or other relationships with authors or institutions connected to the papers.

Responsibilities of Reviewers

- **Confidentiality:** Information in manuscripts must be treated as confidential. Manuscripts should not be shown to or discussed with others without the approval of the managing editor. Reviewers shall not use any submitted material under consideration in their own research.
- **Review Process:** Reviewers shall provide substantive comments on the manuscript, evaluating it for originality, use of arguments and evidence, clarity of presentation, and policy relevance. They shall offer one of the following decisions: publish, publish with revision, revise and resubmit, or reject. Reviewer identities shall be kept confidential. Review guidelines are available.
- **Standards of Objectivity:** All reviews should be objective, constructive, and appropriately substantial. Reviewers should support their views with clear arguments and evidence from the manuscript.
- **Conflicts of Interest:** Reviewers must give unbiased consideration to each manuscript. Reviewers should not be aware of the article author's identity and should not have already read or commented on the article. Reviewers should not agree to review manuscripts in which they have conflicts of interest resulting from competitive, collaborative, or other relationships with authors or institutions connected to the papers.
- **Unqualified to Review or Promptness:** Any reviewer who feels unqualified to review the assigned manuscript or is unable to provide a prompt review by the specified date should notify the managing editor and excuse himself/herself from the review process.
- **Acknowledgement of Sources:** Reviewers should call to the managing editor's attention any significant similarity between the manuscript under consideration and any other publications or submitted manuscripts of which they are aware.

Responsibilities of the Publisher

- **Copyright:** Unless otherwise agreed to in writing, copyright in all content published in *Asia Policy* is vested with the publisher.
- **Corrections and Revisions after Publication:** Should the need for an error correction, retraction, or revision be brought to the attention of the editors or publisher, the publisher is responsible for correcting the record quickly and in a visible manner online.
- **Dispute or Misconduct Settlement:** The publisher will consider complaints against the journal, editorial staff, or the editorial board, as well as any allegations of misconduct by authors, editors, or reviewers either pre-or post-publication, and work to resolve these in a timely manner.
